

Confetti Effects by  
Special Effects Systems, Inc.

Handheld Confetti Cannon 1 inch

◀ 1. Cut the end of the sleeve.

◀ 2. Slide the open end of the sleeve into the barrel.

◀ 3. Take hold of the plastic sleeve.

◀ 4. Slide the confetti or streamers into the barrel. Remove the plastic sleeve completely.

◀ 5. Place a compression cap onto the end of the barrel.

◀ 6. Use compression tape around the barrel and cap. Never tape over end of barrel!

◀ 7. Use thumb to create a good seal on the compression tape.

◀ 8. Make sure trigger is in the closed position.

\*\*\* Continued on Back\*\*\*

◀ 9. Screw the co2 cylinder completely into the trigger.

◀ 10. Hold the confetti cannon pointing upward at a 45 degree angle. The co2 cylinder should be pointing down.

◀ 11. Pull the ring trigger quickly and firmly in one quick motion to fire the confetti cannon.

Do not hesitate when pulling the ring trigger or the cannon will not fire properly.

Never aim the confetti cannon at anyone.

Never leave the confetti cannon unattended after attaching co2 cylinder.

Never hold or fire the confetti cannon in front of your face.

Never hold or fire the confetti cannon above your head.

Do not touch co2 cylinder immediately after firing. It becomes extremely cold.
