

Confetti Effects by
Special Effects Systems, Inc.

T-Shirt Cannon (shoots confetti and streamers too)

◀ 1. Attach the barrel to the trigger handle using the quick connect fitting.

◀ 2. Push the barrel quick connect fitting completely into the quick connect fitting on the trigger handle.

◀ 3. Pull the rings completely back to secure the barrel to the trigger handle.

◀ 4. Make sure the rings are completely pulled back as shown.

◀ 5. Make sure the co2 nut has a o-ring.

◀ 6. Attach the hose to the tank.

◀ 7. Tighten the nut with a crescent wrench. Slowly open the valve on the top of the co2 tank.

◀ 8. Secure the backpack harness with the waist strap. Everything is now ready for you to blast t-shirts into the air! (t-shirts fly over 80 feet)

◀ Lay the t-shirt out flat.

◀ Fold the sleeve as shown.

◀ Roll tightly as shown.

◀ Place three rubber bands on shirt.

IMPORTANT SAFETY NOTICE

Maintain a safe distance from others when handling this unit.
CO2 tank should only be turned on when it is time to fire the launcher.
Safety cable on launcher must be attached to barrel.
Inspect all equipment and barrels before use.
Do not use if cracked or chipped.
Never point a loaded launcher at anyone!!!
